Engr. Maria Therese Gonzales

Human Resources

TechNova Digital Solutions Inc.
IT Park, Cebu City

Dear Engr. Gonzales,

I am writing to express my strong interest in the position of Back-End Developer at TechNova Digital Solutions Inc. I am currently completing my Bachelor of Science in Information Technology at Bukidnon State University and am eager to apply the knowledge and skills I have gained throughout my academic journey to a dynamic and forward-thinking company like yours.

As a consistent Dean's Lister and soon-to-be Cum Laude graduate, I have built a solid foundation in server-side programming, database design, and systems integration. I am proficient in languages such as PHP, Python, and JavaScript, and I have experience working with MySQL and Laravel through various school projects and freelance tasks. During our capstone project titled "Smart Campus Assistance System", I took on the role of back-end lead, where I was responsible for developing the logic, database connectivity, and secure API integrations.

I am passionate about building efficient and reliable systems that contribute to smooth user experiences. I am also a fast learner, a team player, and highly motivated to contribute to a collaborative environment like the one your company fosters.

I have attached my resume for your review. I would welcome the opportunity to further discuss how I can contribute to your team. I am available for an interview at your convenience and can be reached via email or phone.

Thank you for considering my application. I look forward to the opportunity to be a part of your innovative team.

Sincerely,

Jian Abcede
ABCEDE, JIAN STEVE E.
